

Nagy on the Draft Regulation on Matrimonial Property

Csongor István Nagy (University of Szeged, Faculty of Law) has posted [The European Commission's Draft Regulation on the Conflict of Laws of Matrimonial Property – Some Conceptual Questions](#) on SSRN.

The paper analyses, in the context of the European Commission's Draft Regulation on the conflict of laws of matrimonial property and from a choice-of-law perspective, the property issues connected to the dissolution of the marriage, with special emphasis on matrimonial property. It examines the problems emerging from the differences between Member State laws in terms of thinking and conceptualization and analyses how these impact the application of the Draft Regulation.
