Conflict of Laws Bibliography 2013

I am pleased to pass on that Professor Symeon Symeonides has once again compiled a bibliography that covers private international law, or conflict of laws, in a broad sense. In particular, it covers judicial or adjudicatory jurisdiction, prescriptive jurisdiction, choice of forum, choice of law, federal-state conflicts, recognition and enforcement of sister-state and foreign-country judgments, extraterritoriality, arbitration and related topics. You can find it here.

Thanks to Professor Symeonides for continuing to publish this incredibly helpful resource.
