

First e-Apostille issued and registered in Spain

According to the official press release of the Hague Conference on Private International Law dated on 20 May 2011 ([see here](#)), Spain has already issued and registered its first e-Apostilles using state-of-the-art technology developed under the e-APP (electronic Apostille Pilot Program) for Europe project, thus becoming the second State worldwide (after New Zealand) to have completed a comprehensive implementation of both of the e-APP's components

Full adoption of e-APP means that Spain has implemented a technologically advanced system to facilitate (1) the issuance of and use of electronic Apostilles (e-Apostilles), and (2) the electronic registration of Apostilles in an e-Register that is accessible online. Spain is also unique in that it has become the first State worldwide to develop a central e-Register to operate and record data across multiple domestic jurisdictions.

In practice, this means that the applicant can download e-Apostilles online from the website of the Spanish Ministry of Justice ("Sede electrónica"). The applicant will then obtain an electronic file consisting of a digitally signed e-Apostille and the underlying public document. These e-Apostilles are available for public documents issued in either paper or electronic form. The e-Apostille can be easily verified in other States via the central e-Register which will contain information regarding Apostilles issued by all Competent Authorities in Spain.
