

Symeonides' Codifying Choice of Law Around the World

For those readers that did not know yet, early this summer 'Codifying Choice of Law Around the World' (OUP, 2014) authored by Symeon Symeonides, was published. One can only agree with Lawrence Collins in the foreword to this book that it is 'a truly monumental contribution to the study of codification in the conflict of laws'.

The blurb reads:

✘ ***Codifying Choice of Law Around the World*** chronicles, documents, and celebrates the extraordinary, massive country-by-country codification of Private International Law (PrIL) or Conflict of Laws that has taken place in the last 50 years from 1962-2012. During this period, the world has witnessed the adoption of nearly 200 PrIL codifications, EU Regulations, and international conventions—more than in all preceding years since the inception of PrIL. This book provides a horizontal comparison and discussion of these codifications and conventions, firstly by comparing the way they resolve tort and contract conflicts, and then by comparing the answers of these codifications to the fundamental philosophical and methodological dilemmas of PrIL. In the process, this book re-examines and dispels certain widely held assumptions about choice of law, and the art and science of codification in general.
