
After the publication of the third volume of the MPI collection of Studies another volume has been released, edited by Prof. Loïc Cadet (Université Paris I, IAPL), and Prof. Burkhard Hess and Marta Requejo Isidro (MPI).

The book is one of the outcomes of first Post-doctoral Summer School in procedural law, which was held in July 2014 at the Max Planck Institute Luxembourg under the auspices of the International Association of Procedural Law and the Max Planck Institute itself. It reflects both the philosophy of the School and the contents of its first edition. As stated in the Foreword, “modern procedural law is characterized by its opening to comparative and international perspectives”, and “the opening of procedural science also requires a new approach of research which has to be based on comparative methodology”. The
common will of the IAPL and the Max Planck Institute for Procedural Law to support modern research in procedural law, backing particularly young researchers, led to the School one year ago, and achieves another goal with this volume.

The book collects most of the papers which were presented by the students in July 2014, after having been reworked in the light of the discussions of last summer and the advice of the attending professors. Many different areas of procedural law, ranging from regulatory approaches to procedural law, to comparative procedural law, arbitration and ADR, as well as the Europeanisation of civil procedure, are addressed. In this way the treatise demonstrates the current trends of scientific research in procedural law and the specific approach of an incoming generation of researchers.

The contributions of the professors to the School are also to be found in the book. They constitute a kind of homage to an academic work or an author considered as a milestone in the development of procedural and comparative procedural law. In this way also former generations of proceduralists joined the meeting of the different generations: thus the title of the book.

As one of the editors I would like to thank all the authors, and to encourage other young researchers to apply to the next edition of the IAPL-MPI Summer School, July next year.
