

# Labonté on International Assignments

*Hendric Labonté* has authored a book entitled “Forderungsabtretung International. Art. 14 Rom I-Verordnung und seine Reform” (International Assignments. Art. 14 Rome I Regulation and its Reform). The volume has been published by Mohr Siebeck. It is written in German.

The official abstract reads as follows:

*The commercial significance of assignments, especially in an international context, requires a straightforward conflict of laws provision. However, art. 14 Rome I does not provide enough certainty, particularly when it comes to third party effects. These should be entirely determined by the law of the underlying debt.*

More information is available on the publisher’s website.
