

ERA Online Seminar: Digital Technology in Family Matters

On 27 January 2021 ERA (Academy of European Law) will host an online seminar to discuss practical implications of using digital technology in family law cases that often involve vulnerable parties and will therefore need special attention within the digitalisation of justice.

Among the key topics addressed in this event are:

- Legal Tech in family law – and how it affects the lawyer's work
- Digitalisation of family courts, paperless systems and remote hearings
- Online divorce and ODR
- e-codex and the digitalisation of justice systems
- Artificial intelligence in family matters
- Experiences abroad

Additional information about this event is available [here](#).
