

ELI Webinar Series on the Application of the EU Succession Regulation in the Member States

A new series of webinars on the application of the EU Succession Regulation in the Member States will be organised in the framework of the ELI SiG Family and Succession Law. In five webinars of two hours each, representatives of the Member States will talk about their experiences within their respective legal systems.

The organizers state the objectives of the event series as follows (emphasis added):

“Join us for the webinar series on the ‘Application of the EU Succession Regulation in the Member States’!

The **five webinars** organized within the Special Interest Group on Family and Succession Law of the European Law Institute will take place between **March** and **June 2022** and shall shed light on the actual practice regarding cross border succession cases in the Member States. The reporters will open the webinars with short introductory statements and will then take part in a lively panel discussion on the application of the **EU Succession Regulation** in their respective jurisdictions. The results of these webinars will be presented as comparative reports at an online conference in September 2022.

Attendance is **free of charge**. A ZOOM link will be sent to those who register by sending an e-mail to zivilrecht@uni-graz.at

For more information see the program (provided below)!
