

Book on PIL on rights in rem in the EU

The book titled **Private International Law on Rights in rem in the European Union. Derecho internacional privado sobre derechos reales en la Unión Europea** and edited by *Maria Font-Mas* of the Universitat Rovira i Virgili in Spain, has just been released with Marcial Pons.

The book is the result of the several years of collaborative work (referred to here and here) of the researchers from different countries convened by Maria Font Mas under the project PID2020-112609GB-I0 “Property Rights System over Tangible Goods in the Field of European Private International Law: Aspects of International Jurisdiction and Applicable Law”, funded by the Spanish Government.

The great achievement of the editor is in her ability not only to gather and coordinate many authors of various provenance around under-researched topic of rights in rem in PIL but also to have this book published in open access so that it is available to all under no limitations except to have the internet access. The book may be viewed and downloaded at <https://marcialpons-openaccess.es/index.php/juridicas/catalog/book/5> as a single volume or chapter-by-chapter. In case you prefer the paper version, it is available for purchase here.
