

Call for Papers: OGEL Special Issue on 'Space Mining: National and International Regulation for and against Commercial Mining of Outer Space Resources'

OGEL Special Issue on 'Space Mining: National and International Regulation for and against Commercial Mining of Outer Space Resources' will include **dispute resolution over space mining plans as well as dispute resolution among participants in space mining operations** - state vs state and space versus corporations and corporations versus corporations.

Outer Space clearly involves interesting private international law issues.

Proposals should be submitted to the editors by 31st March 2025, with final papers to be submitted before 31st May 2025.
