

# Out Now: Gössl/Kienle, Grundkurs Internationales Privat- und Zivilverfahrensrecht

Any student of German private international law will take delight in the news that a new textbook has just been published by our co-editor Susanne Goessl together with Florian Kienle. The book covers questions of both the applicable law (*internationales Privatrecht*) and of jurisdiction and foreign judgments (*internationales Zivilverfahrensrecht*), with a certain focus on the former area. As one might expect from a new text, it puts the European instruments of private international law (and the areas governed by them) into the centre (pp. 16-144) – without neglecting the areas that remain governed by domestic law (pp. 145-282).

Readers looking to familiarize themselves with German PIL will appreciate the concise introduction to the field (pp. 1-15), the comprehensive coverage of fundamental questions (such as renvoi, characterisation, etc.; starting at p. 157), and the revision questions provided at the end of each chapter. Above all else, however, they will notice the many topical examples used by the authors to explain the material, ranging from climate change and human rights litigation to Covid, the Volkswagen emissions scandal, and the 2021 Suez Canal obstruction by the *Ever Given*. The wealth of these examples alone makes the book a great read even for those who may consider themselves already well acquainted with German PIL (not least if they need to teach it).

More information on the book is available [here](#).
